BEING 'GREEN' PAYS OFF

Grand Haven, Michigan — The Grand Haven Board of Light and Power (BLP) provides incentives for companies to use efficient lighting fixtures. On Monday three BLP officials visited GHSP's Grand Haven facility to present GHSP with the rebate earned by installing the latest lighting fixtures.

Improving energy efficiency isn't the only Green activity GHSP is actively engaged in.

GHSP currently recycles plastic waste, clear plastic bags and films, plastic vacuum-formed trays, steel, lead, cardboard, paper, batteries, light bulbs, old computers, aerosol cans and non-returnable plastic bottles. Since 2006 the company has recycled over 2.3 million pounds of these materials.

GHSP's objectives are twofold: first to reduce our environmental footprint and second to save money through the sale of recycled plastic and steel, lower electricity bills and lower waste disposal costs.

About GHSP

GHSP is a leading global supplier of mechanical and mechatronic control systems to surface transportation industries, including automotive, heavy truck and others. The company serves its customers from concept to delivery with world-class product design, development and program management, as well as excellence in manufacturing in locations around the world. GHSP is a business of JSJ Corporation (www.jsjcorp.com) of Grand Haven, Michigan. Visit www.ghsp.com to learn more about the company.
